**WhizNets Inc.'s** engineering genealogy and culture of continuous product innovation inspires us to help you realize your business ideas into products for your customers.

Our ability to devise custom solutions to your problems and walking with you in your product life cycle has helped us to grow with you and establish a bond of trust and partnership. Our focus is to shape products in a sustainable, profitable and socially responsible way.

WhizNets Inc. has helped traditional businesses across many industrial domains, transform their products to be IOT enabled and partnered young businesses to realize their products.

**WhizNets Inc's** versatility of providing end-to-end solutions may it be user facing applications, middleware components, cloud applications, embedded stacks/drivers or AI-ML enabled process automation; uniquely places us to cater to your many product life cycle requirements.

Our portfolio of licensable IOT connectivity, energy conservation solutions together with our product engineering services, shortens your time to market. We seek partners to make the journey exciting, innovative and mutually beneficial.

The application domains of our IOT enabled solutions include:

- Electric energy conservation and management
- Water conservation and management
- Gas energy conservation and management

## Technology at work for you

Connecting your business to the technology resources you need
